

FOR IMMEDIATE RELEASE

These Blank **Hyper-Mod™** Stratocaster Pickguards Are Now Available For The *Do-It-Yourself* Crowd Who Wants To Get 35 Pure Analog Pickup Tones

Detroit, Michigan, April 3, 2011

Just released – special blank **Hyper-Mod™** Stratocaster pickguards that are designed specifically for **AweSome Musical Instruments** revolutionary patented **Pickup Tone Multiplier™** (PTM) switching system. These items are for the *Do-It-Yourself* person who wants to upgrade their own instrument using PTM product to instantly get the *30 additional pickup tones* that are silently hiding in your instrument. With the *seven times more* pickup tones that these products give, you can finally get that *elusive Signature Sound* you desperately want.

These *PTM-Enabled* acrylic SSS **pickguards come in four colors** (white, black, white pearloid, brown tortoise) and are made to fit a standard American right-hand Stratocaster body. They are designed to accept your three single-coil pickups.

These products are designed to let you *finally* have all the pickup tones ever created on just one guitar. Your guitar will even produce Dozens of unique pickup tones that you have NEVER heard before. These products will introduce you to a huge spectrum of pickup tones from muddy blues to deep, warm slightly overdriven jazz tones, to Ring-in-a-bell Surf to Intense Country Twang to the elusive Tin-Canny tones and even propel you all the way through to the steely, glass-shattering treble of the kind you've never heard from your guitar before.

Even **Les Paul** had great difficulty finding the "right" pickup sound. He said, "*You can spend a lifetime on each individual sound that you wish to create, and there are so many variables that you'll be chasing a sound that you'll probably never find. I'm 90 years old, and I've never found it yet. What I did do is find the best sound for a particular moment.*" — December 2005

Bottom line: The **Pickup Tone Multiplier™** switching system from **AweSome Musical Instruments** is a far superior way for you to explore all the sound possibilities that it will give you. It is arguably the greatest invention since Les Paul invented the solid body electric guitar in 1941.

AweSome Musical Instruments is company based in the Detroit, MI suburb. They have over 30 **Hyper-Mod™** products that are based on their *revolutionary* patented **Pickup Tone Multiplier™** switching system. These products are proudly made in the U.S.A. and are designed to give you more Pure Virgin Analog pickup tones than anything.

"We are known for creating DOZENS of the best pickup tones in the world. You could be known for using them."
