

FOR IMMEDIATE RELEASE

These Blank **Hyper-Mod[™] Telecaster Control Plates Are Now Available For The *Do-It-Yourself* Crowd Who Wants To Get up to 35 Pure Analog Pickup Tones**

Detroit, Michigan, April 10, 2011

Just released – special blank **Hyper-Mod**[™] Telecaster Control Plates that are designed specifically for **AweSome Musical Instruments** revolutionary patented **Pickup Tone Multiplier**[™] (PTM) switching system. These items are for the *Do-It-Yourself* person who wants to upgrade their own instrument using our PTM product to instantly get the *30 additional pickup tones* that are silently hiding in your 3-pickup instrument or twice as many pickup tones from your 2-pickup instrument. With the additional pickup tones that these products give, you can finally get that *elusive Signature Sound* you desperately want.

These *PTM-Enabled* acrylic black control plates are made to fit a standard American right-hand or left-hand Telecaster body or similar instrument with either 3-pickups or 2-pickups.

These products are designed to let you *finally* have all the pickup tones ever created on just one guitar. Now your guitar can even produce Dozens of unique pickup tones that you have NEVER heard before. Our PTM products will introduce you to a huge spectrum of pickup tones from muddy blues to deep, warm slightly overdriven jazz tones, to Ring-in-a-bell Surf to Intense Country Twang to the elusive Tin-Canny tones and even propel you all the way through to the steely, glass-shattering treble of the kind you've never heard from your guitar before.

Even **Les Paul** had great difficulty finding the "right" pickup sound. He said, "*You can spend a lifetime on each individual sound that you wish to create, and there are so many variables that you'll be chasing a sound that you'll probably never find. I'm 90 years old, and I've never found it yet. What I did do is find the best sound for a particular moment.*" — December 2005

Bottom line: The **Pickup Tone Multiplier**[™] switching system from **AweSome Musical Instruments** is a far superior way for you to explore all the sound possibilities that it will give you. It is arguably the greatest invention since Les Paul invented the solid body electric guitar in 1941.

AweSome Musical Instruments is company based in the Detroit, MI suburb. They have over 30 **Hyper-Mod**[™] products that are based on their *revolutionary* patented **Pickup Tone Multiplier**[™] switching system. These products are proudly made in the U.S.A. and are designed to give you more Pure Virgin Analog pickup tones than anything.

"We are known for creating DOZENS of the best pickup tones in the world. You could be known for using them."
