

# DO YOU WANT TO IMPROVE YOUR TELECASTER?

Do you want MORE pickup tones? These are simple ways how you can improve your standard Telecaster, Nashville Telecaster, and HSS or HH Telecaster. Uses mini switches to put each pickup **Off** or **On**, in **normal-phase** or **reverse-phase**, and in **Parallel** or **Series** – and in any combination (*things a blade switch cannot do.*)

### Your 2-Pickup Telecaster

Your 2-pickup Telecaster (*or clone*) comes with a 3-way blade switch to give you 3 pickup tones. You can improve it by installing our upgrade that gives you 6 pickup tones – twice the number of pickup tones that your “stock” guitar has. This simple upgrade uses your own pickups and also includes Treble Bleed your guitar doesn’t have.

### Your Nashville Telecaster

Your 3-pickup Nashville Telecaster (*or clone*) comes with a 5-way blade switch to give you 5 pickup tones. You can improve it by installing our upgrade that gives you 35 pickup tones – seven times the number of pickup tones that your “stock” guitar has. This simple upgrade uses your own pickups and also includes Treble Bleed your guitar doesn’t have.

### Your HSS or HH Telecaster

Your 4-pickup coil Telecaster (*or clone*) comes with a 5-way blade switch to give you 5 pickup tones. You can improve it by installing our upgrade that gives you 68 or 102 pickup tones – twenty times the number of pickup tones that your “stock” guitar has. This simple upgrade uses your own pickups and also includes Treble Bleed your guitar doesn’t have.
