Special Note: After trying to create a pickup tone mapping worksheet for this TriBucker humbucker pickup combination, it became clear that there were just too many (actually a few hundred) pages to document all of the switch combinations. Rather than waste time and resources, the switch combinations for the Bridge pickup and Neck pickup are presented separately, and then together.

The push-pull pot (if included) is also shown in the out position (O) where it is applicable.

If you want to explore ALL the combinations, the logical way to do it is as follows:

Go through each Bridge combination first.

Then do it again but adding Neck switch combination #36.

Do it again, but adding Neck switch combination #37.

Again, but adding Neck switch combination #38.

Do this all the way through Neck switch combination #70.

Reverse the process by going through each Neck combination first.
Then do it again but adding Bridge switch combination #1.
Continue until you have gone through Bridge switch combination #35.

This is new "pickup tone territory" created by combining our T3Plus-T2 switch and our TriBucker and Humbucker. It gives you a completely new Galaxy of pickup tones that no other instrument can offer you and your creativity. We hope you enjoy what we have brought "to the party"?

This also gives you several **PentaBucker**(tm) pickup tones (all five coils in series)
Now you can get pickup tones so "fat", they're... Obese!

Print the following page and create your own tone mapping sheet.

This page is also available for download from our AweSome-Guitars.com website document library.
